

## Fighting debit order abuse with DebiCheck.

### Why DebiCheck?

Unauthorised debit orders are a serious problem

DebiCheck is a once-off security measure for consumers to confirm debit orders on their accounts.

### How does it work?

The consumer signs a contract that allows you to debit their bank account

The consumers bank will contact them to confirm the details of the debit order

The consumer will accept a once off confirmation of the debit order details

The debit order is then processed on the agreed upon date every month

### What do you need to do?

Ensure your bank has your correct cellphone number for confirmations.

Respond when your bank contacts you about new debit orders
